## ABOUT THE ORGANIZATION

ISET-Nepal is a leading policy research think tank established to advance climate resilience and sustainable development in Nepal. Operating since 2001, the organization specializes in disaster risk reduction, climate adaptation, urban resilience, and inclusive development strategies.

Through action research, capacity building, and multi-stakeholder engagement, the organization bridges science and policy to support vulnerable communities and strengthen institutional capacities. ISET-Nepal's work spans climate-smart livelihoods, water-energy-climate nexus analysis, gender-transformative programming, and critical infrastructure resilience. As a trusted partner to government

agencies, international donors, and local communities, ISET-Nepal transforms knowledge into practical solutions that enhance Nepal's adaptive capacity amid growing climate uncertainties and development challenges.

ISET-Nepal works with diverse national and international academicians, researchers and organizations in research and other activities. It has a team of experts and talented youths who work full time or involve as per the existing projects' requirements.

### MISSION

Improve understanding and elevate the level of dialogue as civil society attempts to respond to natural resource and environmental challenges through the generation and dissemination of new knowledge on natural resources and the well-being of society.

### GOAL

Conduct research and hold interactions on subjects related to environment and social development to enhance the capacity of youth through education, training, and interactions at the local, regional and national levels.

## AREA OF SPECIALIZATION

Climate change and resilience building

Adaptation frameworks

Water governance

Urban and peri-urban agriculture

Disaster risk management

Governance

Communication & capacity enhancement

Green Infrastructure

Energy

## ACTIVITIES

Conduct research, monitoring, dissemination, and interactions on subjects related to environment and social development.

Encourage youth in area of natural resources and environmental management, and increasing their capacity through education.

Conduct exchange of academic cooperation, interactions, and discussions at the national, regional, and international levels.

Function as a forum for the open and participatory exchange of high professional ideas.
